### DIFFERENCE BETWEEN

Airbrush makeup and HD makeup are both popular choices for achieving flawless-looking skin, but they differ in application techniques and formulations.

#### *Air Brush*

- Applied using an airbrush gun that sprays a fine mist of makeup onto the skin.
- Creates a lightweight, sheer, and natural-looking finish.
- Provides buildable coverage and is often used for special occasions or events due to its long-lasting and water-resistant properties.
- Blends seamlessly into the skin, minimizing the appearance of imperfections.

#### *High Definition*

- Refers to makeup specifically designed for high-definition cameras and photography.
- Uses specialized products that are finely milled and formulated to provide a flawless, photo-ready finish.
- Offers buildable coverage and can be applied using various techniques, including brushes and sponges.
- Helps create a smooth complexion, minimizing the appearance of pores and imperfections under high-definition scrutiny.

In essence, while both airbrush and HD makeup aim for a flawless look, airbrush makeup is applied using an airbrush gun and provides a lightweight finish, whereas HD makeup is tailored for high-definition cameras and aims for a flawless appearance in photography and film.
